THE DAILY EMPIRE.

VOL IV DAYTON O. WEDNESDAY, MAY 22 1867. NO. 211.

THE BASIS OF REPUBLICAN GOVERNMENT.

Resolved, That the several States composing the United States, are not united on the principle of unlimited submission to their General Government, but that by compact, under the style and title of a Constitution of the United States, and of amendments thereto, they constituted a General Government, for special purposes—delegated to that Government certain definite powers, reserving to themselves, to their States, to their people, and to their several States, all other powers not delegated to that Government, and not prohibited to them; that the Government created by this compact was not made the exclusive or final judge of the extent of the powers delegated to itself, since that would have made its discretion, and not the Constitution, the measure of its powers; but that, as in all other cases of contract among free men, they have made it their mutual interest to adhere to the common law, each party has an equal right to judge for itself, as well of infractions as of the mode and measure of redress.

The suit against the Mutual Benefit Life Insurance Company, of New Jersey, to recover a policy of \$10,000, with interest for eight years, was decided for the plaintiff. The company had refused payment because their agent in the city received payment of the premiums after the time thereof had expired.

A Detroit paper reports a case of "seam man" involving the ministers in "one of the church societies in a neighboring village down the river." The minister has been suspended and the case is to be legally investigated.

On Wednesday last, while four men were working in a stone quarry near Roundout, New York, a large mass of rock gave way and fell upon them. Three of them were instantly killed and the fourth was hemmed in so tightly that drills had to be used to secure his release. His arm was crushed and his feet badly bruised.

A negro in a street car in New Orleans threatened to shoot a woman, who had protested against his insults, "as quick as he would any d—n white rebel." The conductor said he did not dare to put him out as he was a colored man.

The Indianapolis Herald tells of a row the other day between some colored people in Shelbyville in regard to the merits of the Jullian family. In the course of the quarrel one of the negroes, Buncombe by name, shot Hiram Estes, a mulatto, inflicting a wound of which he died on Sunday.

Washington News and Gossip.
WASHINGTON, May 21.—The consumption of distilled liquors for 1865 was estimated at 40,000,000 gallons. The revenue at \$2 a gallon should have been \$80,000,000, but it amounted in fact, to only \$20,000,000. This simple fact of itself amply shows to what extent certain parties in the country go in evading the payment of an oppressive revenue law.

The Judiciary Committee to-day disposed of the Kansas branch of the Pacific Railroad dispute by declaring in favor of the Fremont Company, who are now in possession of the road.

The New Orleans Picayune's special correspondence, dated Orleans, May 2, says the City of Mexico is surrounded by 20,000 Liberals, and the bombardment had commenced in earnest. The garrison numbered 9,000 men, under a general, who had announced his intention to resist to the last. He had impressed all the water carriers and porters. No officers are to receive quarter from the Liberals. Orders are issued that Miramon, Marquez and Maximilian shall be shot if captured. Since the surrender of Puebla the Liberals have not over 10,000 men all told.

Financial matters in the Treasury and War Departments are not so desperate as has been given out. Secretary McCulloch says the Treasury can get along easily until December. The military indebtedness of the United States is being converted at the rate of more than a million per day, and there is no reason to doubt but that the first series of seven-thirties and the early compound-interest notes will be converted by the end of the fiscal year. The Treasury will, therefore, not be pressed to redeem them.

As regards the recent publication that the War Department will need, for the current year, one hundred and twenty-five millions of dollars, both Secretary McCulloch and Secretary Stanton deny it. The Secretary of War has made no such estimate, and declares that the figures published are made up from false premises.

Boat Burnt—Lightning Tragedy.
St. Louis, May 21.—The steamer Albert Pearce was burned this morning near Lake Providence, on the Mississippi. She was worth about \$70,000, and was pretty well insured. She was owned by St. Louis.

A young man named Jules Kingsbury, of good family in this city, was found dead on the sidewalk, about five o'clock yesterday afternoon, just after the thunderstorm, having been killed by lightning.

The Aquatic Match.
PITTSBURGH, May 21.—The great swimming match for the aquatic championship of the United States and a purse of \$2,000, between James Hamill, of this city, and Walter Brown, of Portland, Maine, came off this afternoon on the Montgomery river. The interest centered in this contest has been felt throughout the country.

Brown got the start, and kept it, but Hamill complains that he was crowded to the shore, and he claims the race in consequence of alleged foul play. The decision of the judges will be given to-morrow.

The race was five miles, the stake, \$1,000. Brown's time was 43 min. 30; Hamill's 58 min. Probably \$3,000 changed hands on the result.

Cruelty in Public Schools.
SPRINGFIELD, Mass., May 21.—An indignation meeting has been called by prominent citizens for to-morrow night, to determine what action the people will take to suppress the unmerciful cruelty, wanton barbarity and other heinous crimes, in our public schools.

GRAND CHARITABLE PRESENTATION CONCERT!
IN AID OF THE Southern Orphans' Association, Incorporated by the Legislature of Virginia, January 24th, 1867.

To be Given in Baltimore, June 17th, 1867.

The profits of this concert will be given to the Southern Orphans' Association.

The officers of the Southern Orphans' Association, for the maintenance and education of the orphans of deceased Southern soldiers and sailors, earnestly solicit the sympathy and co-operation in our grand presentation concert, to be given in Baltimore, June 17th, 1867.

It is the desire of the Association to erect a Home and School for the orphans of the South, both male and female, on an extensive scale, in the city of Richmond, Va. An industrial school, having the building located there, the Common Council of that city is to guarantee ten acres of land in an elevated and healthy location, and will increase the quantity of land if needed.

It is necessary to solicit contributions to the above, but the calls upon the institution have been so numerous and pressing, and the struggle to maintain the same, that the Association is now in a position to receive contributions of all kinds, and to receive contributions of all kinds, and to receive contributions of all kinds.

The circle of its charities is of such an arduous nature, that the management is unable to do more than to receive contributions, and to receive contributions of all kinds, and to receive contributions of all kinds.

AMERICAN WALTHAM WATCHES.

I—We claim, and are prepared to prove, that the American Watches, manufactured at Waltham, Mass., are not only equal, but far superior to the common watches of England, Switzerland, and France.

II—While we admit that it would be difficult to excel the masterpieces of the eminent European manufacturers, and while we do not claim to have made any decisive improvements over them, we do assert and challenge a successful denial, that our superior class of watches are fully equal, in every respect, to the most expensive specimens of foreign chronometrical art.

III—We claim that our Watches are cheaper, more accurate, less complex, more durable, better adapted for American use, and more easily kept in order and repaired than any other watches in the market.

IV—The reasons why our Watches possess these advantages over their European rivals are chiefly:

First. Because the principle of the division of labor is carried out in our workshops to its extreme limits, not in human industry only, but in machinery as well. Every watch passes through hundreds of hands and hundreds of machines.

Second. Because we promptly adopt every new invention to perfect our machinery, and every improved improvement in the structure of watches.

Third. Because in each of the very numerous, minute, and often microscopic parts of which a watch is made up, we attain, by mechanical power, nearly absolute mathematical precision and uniformity, which is utterly impossible to achieve by manual labor. Wheels, pinions, escapements, balances, springs, and screws—exact counterparts in weight, circumference, and dimensions—are turned out by millions by the unerring, because unswerving, iron hand of machinery. Hence, every watch of any style is a true copy of its model.

V—These results enable us to defy foreign rivalry, because no similar uniformity and precision is attainable by hand, and because in Waltham alone is machinery exclusively employed in the manufacture of this intricate and delicate mechanism.

VI—Now, as will be seen at once, this similarity in structure reduces the cost of production; it secures uniformity in results;
